DETAILED ACTION

Quayle Action

1. This application is in condition for allowance except for the following formal matters:

Drawings

- Applicant is requested to include at least a block diagram that outlines the knitting, braiding and weaving steps used in the method of making the claimed invention. Additionally, Applicant is also requested to show a general structure of the finished fabric that provides a taper to the claimed invention, which would allow easy and proper understanding of the claimed invention to a practitioner in the marine art.

No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Abstract

- Applicant is requested to amend the abstract to identify the novel features of the claimed invention. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Specification

- Applicant is requested to list the US Patent Numbers of each of the related, and now allowed, applications identified in the first sentence of the specification.

Conclusion

2. Claims 29, 32-36, 44 and 47-55 are allowed.
3. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
